

Portrait studio Melbourne | Portrait photography Melbourne

Design your dream photoshoot

Firstly we will have a consultation over the phone or in person to design your shoot. In this session I will guide you through the styling process and prepare something that I call a mood board for you.

Professional make up artist

As part of the experience, a professional makeup artist will help you not just feel pampered but to look gorgeous, confident and be the best version of yourself!

Cosy and professional studio

The photoshoot is done in my cosy and friendly space in Cranbourne North. I will make you feel comfortable and relaxed while you will be enjoying a glass of bubble with strawberries.

Access to my studio wardrobe

You will get access to my wardrobe collection (I do have a special maternity collection too) and play dress up, mix-and-match glam pieces adding your own style.

The reveal

This is the most exciting part where you come back to view 25 professionally edited images on display in my studio.

Prints and wall art

For every portrait collection that you purchase, you will receive high resolution images and archival art print ready to frame along with a beautiful handmade folio box. This is your heirloom, created for you and for future generation to treasure.

I create VOGUE magazine look portrait for powerful women who want to celebrate themselves, or be captured with their loved ones.
