

# novas

FTG Marketing (S.E.A) Pte Ltd is the parent company of Novas. We are established in Singapore since 2007. We started as a sole distributor of the world's first portable fridge which does not require any external power source to run. Subsequently, we also started to distribute premium air purifiers. Our passion further drove us into exploring and developing our own brand of air purifiers, and other lifestyle related products that would help to improve our day to day living; initiating the birth of Novas.

Our air purifiers come with a 7-stage filtration process using True HEPA filters. It also comes with a Lifetime Warranty to give you the peace of mind. It's an honest proposition from a Company that believes it has a game-changing technology that you should experience for yourself.

## **NV11B & NV30B**
